

Computer Science Aptitudes Test

(Sample cover page - subject to change)

- The test duration is 210 minutes, which includes 30 minutes for showing each written page to the camera, then scanning and uploading all scripts.
- There are 12 questions, each equally weighted. Your best 6 questions are considered. You can choose the questions to answer. All questions attempted are marked. Partial answers and rough work are also considered and cannot disadvantage you.
- Start a new question on a new page – do not answer multiple questions on the same page.
- Show sufficient justification for every answer in order to make your solutions clear to the Examiner.
- Calculators, phones, watches, smart-glasses, other electronic devices, beyond those strictly required for taking the test, are not permitted.
- It is recommended that you first read through all questions, and then aim for 6 questions.

Good luck!
